

# Email Encryption

## Send confidential emails with confidence

Send confidential emails with confidence, using CloudPoint Technology's CipherPost Pro email encryption service. With CipherPost Pro, your message remains encrypted all the way to the recipient. You control who sees your messages, and a patented delivery slip will show you when they're received and opened. There's no hardware or software to manage, you can cancel any-time and you get a 30-day free trial. All backed by AppRiver's Phenomenal Care™.

## Features & Benefits

- Ensures protection of confidential information and helps maintain regulatory compliance, enabling your business processes to operate efficiently
- Provides senders with a patented delivery slip that shows who receives your message and what they do with it
- Enables easy-to-use protection of email traffic to any user, with no client software required
- Requires minimal overhead, eliminates message or key storage, and has the lowest volume of helpdesk calls in the industry
- Scales to the largest enterprise and integrates with existing technology investments, including content filtering and identity management solutions
- Eases administration through centralized management and reporting, even across multiple data centers
- Transform any Web or PDF form into an online Secure e-Form for easy provisioning
- Helps businesses comply with a variety of privacy laws and regulations, including HIPAA
